SUMMARY

Highly creative professional with 6+ years of experience implementing efficient workflows utilizing an array of tools ranging from Microsoft Suite to automation using different programming tools. Completed an intensive year-long program at Kenzie Academy in backend development, gaining skills in Java, AWS, React, working on an agile team, and using algorithms. Currently seeking a career in Software Engineering.

SKILLS

HTML/CSS	REST API	Agile
GIT	AWS	QA Testing
JavaScript	C++	Software Support
Java	AutoCAD	Debugging

EDUCATION

California -State University Long Beach   **Expected: 2023**
Bachelor of Arts in Mechanical Engineering

Kenzie Academy from Southern New Hampshire University   **Jan 2023**
Software Engineering Certificate with Specialization in Backend Java
- Completed hands-on, 12-month certificate program designed by industry professionals and advised by employer partners, building web applications from ground up

Cerritos College   **May 2020**
Associate of Science in Natural Science/Material Science

PROJECTS

[E-Groceries](#) | **Backend Lead/Front-End Design Support**   **Nov 2022 - Dec 2022**
Tech Stack: Java, JavaScript, HTML, CSS, AWS Cloud, Spring Boot, Git, Caching
- Designed and implemented a wholesale distribution web application to easily allow businesses to manage their inventories
- Integrated AWS as a consistent data storage, which leveraged in-memory caching for discounted items
- Designed backend API server for enabling storage through an online database
- Led the front-end design integration, to allow for a fluid and easily manageable interface

Crime Watchers | Backend Lead/Front-End Design Support   **Nov 2022 - Jan 2023**
Tech Stack: Java, HTML, CSS, JavaScript, Spring Boot, Git, Distributed Cache (Crime History), AWS Cloud
- Created a web application that allows users to see live crime data happening in their neighborhood
- Developed features that gave the user the ability to create events, receive notifications, and write live comments about ongoing open cases in their area
- Used external API providing live crime data, linked to an AWS cloud management server, with implemented lambdas, all fetching data from the API
- Collaborated on a team of 5, adhering to agile/scrum methodology

WORK EXPERIENCE

Supply Chain Coordinator | Port X Logistics   **Sep 2021 - Nov 2022**
- Built client relationships & attracted potential customers through suggestions and by providing tailored support
- Creatively problem-solved for customers by creating solutions in Excel VBA, Google App Scripts and PDF Editors to allow for tailored support
- Provided technical support to colleagues, allowing for an improved workflow within the team environment
- Achieved exceptional levels of customer satisfaction through timely responses of emails and customer phone calls

Dispatch Representative | Apex Logistics   **Feb 2020 – Sep 2021**
- Managed a team of 8-12 warehouse individuals to ensure they properly met truckload appointments
- Reinvented billing protocols not up to par with current technologies, by utilizing automated Excel sheets with Excel VBA
- Commended for team-oriented attitude and leadership qualities, which ensured minimal human error as well as efficiency through an increased volume during the COVID time-period
- Ensured QA was kept by creating inventory logs, fleet management, and daily operational checks to ensure proper shipping and handling of freight/equipment
